

Phoenixbuilds or phoenixbuildsMC is an individual or a group who claim to be a group of professional builders in minecraft, and sell "their" buildings on their website. <https://phoenixbuilds.net/portfolio/>

this is nothing but a fraud, they just want to steal your money. They steal existing buildings, sometimes they edit some stuff, and sometimes they don't edit anything, and sell the builds saying they made it, when in fact you can find the buildings for free posted by the original creators.

evidences:

1-

so far, this was their most recent post

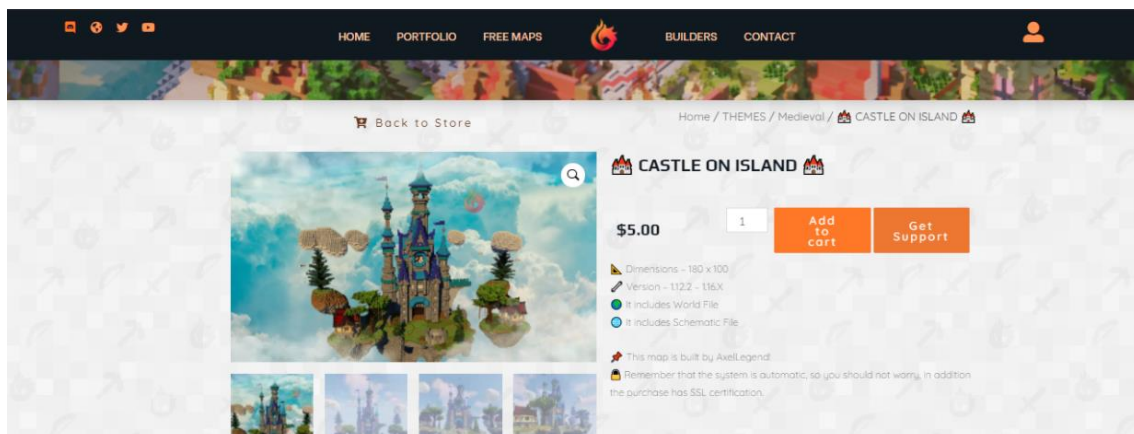

In fact, this build was made by a youtuber and builder called "thebigbaron"

In this build, you can clearly see that the dragons actually is a build from “thebigbaron” you can see his builds at: <https://www.planetminecraft.com/project/fantasy-collection/>

CONCLUSION

if they really are “professional builders, who can build things” like this:

what's the point of stealing already made buildings, and putting them in their own buildings?
or worse, steal other people's buildings, change nothing, and sell it saying it's yours?
